Bowei Xu

College Station, TX | (213) 245-6688 | bowei_xu@outlook.com

PROFESSIONAL SUMMARY

Full-stack software developer with 3+ years of experience independently designing and delivering enterprise-grade business systems. Proven ability to translate complex operational requirements into robust software solutions. Skilled at combining modern AI-assisted development workflows with deep technical execution to ship faster and smarter.

SKILLS

- Programming Languages: PHP, JavaScript, SQL, Java, Python
- Backend: REST API, Apache, Node.js, Express.js
- Frontend: React, React Router, Vite, Axios, HTML, CSS
- Database: Microsoft SQL Server, MySQL — schema design, query optimization, migrations
- DevOps & Tools: Git, GitHub, Linux, AWS, Azure, Unix Shell
- AI & Tooling: Claude Code, ChatGPT, Prompt Engineering — integrated into daily dev workflows
- Domain: ERP/MES systems, e-commerce platforms, manufacturing operations software

WORK EXPERIENCE

Trygve Enterprises LLC DBA Fuel Cell Store, Software Developer **Bryan, TX** Aug 2023–Present

- Sole developer for an end-to-end ERP/MES-style platform — independently architected a 50+ table relational database schema and 100,000+ line codebase supporting order processing, lot-level material traceability, and fuel cell manufacturing workflows.
- Led migration of a live e-commerce platform (OpenCart 1.5 → 3.0) with 2,000+ products and 70,000+ historical orders, including custom SQL migration scripts, full UI redesign, and zero data loss.
- Translated complex manufacturing and operations requirements directly into software — working hands-on with business stakeholders to design systems that mapped to real production workflows.
- Designed and optimized complex SQL queries and relational database schemas to support reporting, data integrity, and system performance.
- Developed and maintained REST APIs to integrate internal tools and support frontend and backend communication across the system.
- Maintained and stabilized production systems — diagnosing issues, resolving defects, and improving long-term reliability for daily business operations.
- Leveraged Claude Code and AI-assisted workflows to accelerate feature delivery, automate code generation, and streamline debugging — meaningfully reducing development cycle time.

Digifinex, Software Engineering Intern **Irvine, CA** June 2022–Aug 2022

- Collaborated with product managers and senior engineers to design, analyze, and implement system features in line with business requirements.
- Developed and tested frontend and backend components to ensure reliability and performance.

EDUCATION

University of Southern California, Los Angeles, CA Aug 2020–Dec 2022
Master of Science, Computer Science **GPA: 3.61/4.00**

Henan University (HENU), Kaifeng, Henan, China Sep 2016–June 2020
Bachelor of Engineering, Computer Science and Technology **GPA: 3.69/4.00**

HONORS & AWARDS

- HENU Merit Student & Merit Scholarship 2020 & 2019 & 2018 & 2017
- 1st Place, Houston Go Tournament 2025 & 2023
