

## Bowei Xu

College Station, TX | (213) 245-6688 | bowei\_xu@outlook.com | antoinexu.github.io

### PROFESSIONAL SUMMARY

Three years as the sole developer of a manufacturer's internal operations platform, covering order management, warehouse (WMS), and shop-floor execution (MES) on PHP and Microsoft SQL Server. Built it to replace the VB.NET WinForms desktop system the company ran on, and own it end to end: a 50+ table schema, the application layer, and the Linux servers it runs on. Rebuilt the company's live e-commerce platform two major versions forward alongside it, re-implementing its custom functionality and migrating years of product and order data.

### SKILLS

- Programming Languages: PHP, JavaScript, SQL, Python, Java
- Backend: REST API, Node.js, Express.js
- Frontend: React, HTML, CSS, responsive UI
- Database: Microsoft SQL Server, MySQL, schema design, query optimization, data migration, reporting
- Infrastructure & Tools: Linux, Apache, cPanel/WHM, Git/GitHub, Bash, AWS, Claude Code, Codex
- Domain: ERP/WMS/MES systems, OpenCart, e-commerce platforms, manufacturing operations software

### WORK EXPERIENCE

**Trygve Enterprises LLC DBA Fuel Cell Store, Software Developer**      **Bryan, TX**      Aug 2023–Present

- Sole developer of an ERP/WMS/MES platform on PHP and Microsoft SQL Server, building a 50+ table schema and 40+ operational reports to support order processing, scan-driven warehouse operations, lot-level material traceability, and fuel cell manufacturing workflows.
- Migrated a live e-commerce platform from OpenCart 1.5.6.4 to 3.0.3.8, including 2,000+ products and 70,000+ historical orders, reverse-engineering undocumented customizations from the legacy code, writing the cross-schema SQL by hand, and completing the cutover with no data loss or downtime.
- Work directly with business stakeholders to translate manufacturing and operations requirements into software features aligned with real production workflows.
- Maintain production systems and servers: Linux, cPanel/WHM VPS, multi-site PHP and database version management, and OS and database major-version upgrades.
- Built and maintained REST APIs, optimized SQL and reporting workflows, stabilized production systems, and used AI-assisted development tools to shorten delivery cycles.

**DigiFinex, Software Engineering Intern**      **Irvine, CA**      Jun 2022–Aug 2022

- Collaborated with product managers and senior engineers to design, analyze, and implement system features in line with business requirements.
- Developed and tested frontend and backend components to ensure reliability and performance.

### EDUCATION

**University of Southern California**, Los Angeles, CA      Aug 2020–Dec 2022  
Master of Science, Computer Science

**Henan University (HENU)**, Kaifeng, Henan, China      Sep 2016–Jun 2020  
Bachelor of Engineering, Computer Science & Technology

### HONORS & AWARDS

- HENU Merit Student & Merit Scholarship      2017, 2018, 2019, 2020
- 1<sup>st</sup> Place, Houston Go Tournament      2023, 2025

### INTERESTS

- Go / Weiqi: AGA 6-dan, Chinese 5-dan, certified national referee (China, Level 2)
