PROFESSIONAL SUMMARY

Business systems engineer with 3+ years as the sole developer of a manufacturer's operations platform (ERP, WMS, MES) on PHP and Microsoft SQL Server. Rebuilt it from an undocumented VB.NET desktop system and own it end to end, from the database schema to the Linux servers it runs on. Also own the company's online stores, from an OpenCart major-version upgrade to the current move to Shopify.

SKILLS

- Programming Languages: PHP, JavaScript, SQL, Python, Java, Go
- Backend: REST API, Node.js, Express.js
- Frontend: React, HTML, CSS, responsive UI
- Database: Microsoft SQL Server, MySQL, schema design, query optimization, data migration, reporting
- Infrastructure & Tools: Linux, Apache, cPanel/WHM, Git/GitHub, Bash, AWS, Claude Code, Codex
- Domain: ERP/WMS/MES systems, OpenCart, Shopify, manufacturing operations software

WORK EXPERIENCE

Trygve Enterprises LLC DBA Fuel Cell Store, Software Developer **Bryan, TX** Aug 2023–Present

- Designed and built the ERP/WMS/MES platform, in daily use across the office and shop floor, on a 50+ table schema with 40+ operational reports covering order processing, scan-driven warehouse operations, lot-level material traceability, and fuel cell manufacturing workflows.
- Migrated a live e-commerce platform from OpenCart 1.5.6.4 to 3.0.3.8, including 2,000+ products and 70,000+ historical orders, reverse-engineering undocumented customizations from the legacy code, writing the cross-schema SQL by hand, and completing the cutover with no data loss or downtime.
- Moving the company's three sites to Shopify and owning the data migration and cutovers.
- Integrated the OpenCart storefront with Google Tag Manager, GA4, and Google Ads conversion tracking via a dataLayer emitted from the PHP templates, and resolved Search Console indexing issues.
- Maintain production systems and servers: Linux, cPanel/WHM VPS, multi-site PHP and database version management, and OS and database major-version upgrades.
- Work directly with business stakeholders to translate manufacturing and operations requirements into software features aligned with real production workflows.

DigiFinex, Software Engineering Intern **Irvine, CA** Jun 2022–Aug 2022

- Contributed to API integrations, interface protocols, and technical docs for a trading platform.
- Worked across the stack in Go, JavaScript, and MySQL, with Git for version control.

EDUCATION

University of Southern California, Los Angeles, CA Aug 2020–Dec 2022
Master of Science, Computer Science

Henan University (HENU), Kaifeng, Henan, China Sep 2016–Jun 2020
Bachelor of Engineering, Computer Science & Technology

HONORS & AWARDS

- HENU Merit Student & Merit Scholarship 2017, 2018, 2019, 2020
- 1st Place, Houston Go Tournament 2023, 2025

INTERESTS

- Go / Weiqi: AGA 6-dan, Chinese 5-dan, certified national referee (China, Level 2)
